38 Willett Street • Albany, NY 12210 • bryan@bryanmooney.io • 518-461-9309

### **Experience**

#### **Offensive Security Leader / Delivery & Operations**

##### **Leet Cyber Security**

Progressed from intern to senior leadership role over 8 years, spanning hands-on offensive security, technical coordination, and company operations.

**Role Progression:** Intern → Penetration Tester → Lead Hacker Coordinator → COO

##### **Key Contributions**

- Conducted and led penetration testing, red team and purple team engagements for organizations ranging from SMBs to regulated enterprises.
- Evaluated and challenged EDR, SIEM, and security tooling by actively attempting to bypass them.
- Coordinated and mentored technical staff, standardizing methodologies, and delivery quality.
- Served as primary technical authority for complex engagements and client advisory.
- Oversaw delivery operations, project execution, and internal systems as part of executive leadership.
- Bridged offensive findings to business risk, remediation strategy, and executive decision-making.
- Served as a trusted technical advisor during SOC2, HIPAA, and GDPR security efforts.
- Served as a presales technical advisor, shaping service offerings and scoping engagements to ensure technical feasibility, realistic timelines, and defensible security outcomes.

##### **Leadership & Systems Impact**

- Served as COO with direct responsibility for delivery execution, project coordination, and technical quality.
- Maintained institutional knowledge across tooling, methodology, and client environments.
- Shape service offerings to focus on practical security outcomes.
- Influenced firm direction by grounding strategic decisions in firsthand offensive security experience, delivery capacity, and real-world risk.

##### **Selected Initiatives**

- *Security Tool Validation*  
Validated client security investments by actively testing EDR, network detection, and alerting pipelines during real attack simulations, identifying blind spots and false confidence.
- *Vulnerability & Risk Tracking Systems*  
Architected iterations of Leet's vulnerability and risk tracking systems, meeting client expectations and adhering to feedback from clients and the team.
- *R&D Architect*  
Worked closely with the R&D team, architecting automations ranging from proprietary pentesting tooling to operations and sales automations.

## Community Involvement

### Mentor – Big Brothers Big Sisters of the Capital Region

- Providing long-term mentorship to a youth in the Capital Region, fostering personal growth, career readiness, and social-emotional well-being.
- Participating in community activities to encourage youth development and engagement

## Education

Associate of Applied Science (A.A.S) – Computer Information Systems (Information Management)  
*Dutchess Community College*

Coursework toward bachelor's degree – Informatics (Cybersecurity)  
*University at Albany (SUNY)*
